

National ENERGY STAR Lighting Partner Meeting

The National ENERGY STAR Partner Meeting for Lighting will be held in late February/early March 2003. This time of the year was selected in order to position the meeting as a forum to launch the 2003 national lighting promotion. In addition, this meeting will be designed to allow ample time to network and learn about specific regional and utility residential lighting programs and obtain updates from lighting industry members.

To assist in the preparation of the agenda and other activities for the Lighting Meeting, a group of utilities, stakeholders, and manufacturers will be organized in late 2002 to begin planning. Discussions will be facilitated by Paul Berkowitz pberkowitz@drintl.com.

Thank you for your continued interest and support in ENERGY STAR, and we look forward to a great meeting in 2003!
